

Alex Carter

Aspiring Machine Learning Engineer | alex.carter@email.com | github.com/alexcarter

Summary

Computer Science graduate with hands-on experience building data-driven applications in Python. Comfortable with data analysis, machine learning workflows, and collaborating in Agile teams using Git.

Skills

Python, SQL, Pandas, NumPy, scikit-learn, Matplotlib, data analysis, machine learning, Flask, Git, GitHub, Linux, problem solving, teamwork, communication.

Experience

Data Analyst Intern, DataCorp (2024)

Cleaned and analysed customer datasets with Pandas and NumPy, building dashboards that informed product decisions. Automated weekly reporting with Python scripts.

Freelance Python Developer (2023)

Built REST endpoints with Flask and integrated a scikit-learn model to classify support tickets, reducing manual triage time.

Projects

Movie Recommender - Built a content-based recommender in Python using scikit-learn and TF-IDF. Visualised results with Matplotlib.

Education

B.Sc. Computer Science - State University (2024)
